Type 2508

Cable plug

The pilot-controlled 3/2-way solenoid valve Type 0340 with smoothly operating servopiston requires a differential pressure of 0.5 bar for complete opening and closing. A 3/2-way pilot valve (pivoted armature valve) ensures safe and reliable operation.

Circuit function C

3/2-way valve, when de-energized outlet port A exhausted, with 3-way pilot control

Circuit function D

3/2-way valve, when de-energized outlet port B pressurized, with 3-way pilot control

Circuit function C (Impulse)

3/2-way valve, when de-energized outlet port A exhausted, with 3-way pilot control

3/2-way solenoid valve for gases and fluids

- Service friendly manual override
- Analytical pilot valve for increased safety
- Optimized piston design for low switching pressure
- Energy saving impulse coil
- Explosion proof types
