

3/2-way Solenoid Valve for liquid and gaseous medium

- Service friendly manual override
- Analytical pilot valve for increased safety
- Externally controlled and vacuum suited

Type 0343 can be combined with...

Type 2508

Cable plug

The pilot-controlled 3/2-way valve Type 0343 with a smoothly operating servo-piston requires no differential pressure for complete opening and closing. A 3/2-way pilot valve (Pivoted armature valve) ensures safe and reliable operation. It is available in circuit function C and D. The externally controlled valve, Type 0343, requires auxiliary pilot air of at least 2 bar above the operating pressure.

Circuit function C

3/2 way servo-controlled solenoid valve, normally closed, with auxiliary pilot air

Circuit function D

3/2 way servo-controlled solenoid valve, normally open, with auxiliary pilot air

Technical data	
Orifice	DN 8.0 - 40 mm
Body material	Brass
Coil material	Epoxy
Coil insulation class	H
Seal material	NBR
Medium	Neutral gases, water, hydraulic oil, oils, fats, additives
Medium temperature	0 to +90 °C
Ambient temperature	Max. +55 °C
Voltage tolerance	±10 %
Duty cycle	Continuous operation 100% ED
Electrical connection	Cable plug for Ø 7 mm cable, acc. to DIN EN 175301-803 Form A (supplied as standard)
Protection class	IP 65 with cable plug
Installation	As required, preferably with actuator upright
Flow rate Q _{Nn} value air [l/min]	Measured at +20°C, 1 bar pressure at valve inlet and free outlet
Pressure values [bar]	Overpressure with respect to atmospheric pressure
Response times [ms] opening Closing	Measured with water at valve outlet at 6 bar and +20°C Pressure rise 0 to 90%, Pressure drop 100 to 10%

* Cable plug Type 2508 (supplied as standard) acc. to DIN EN 175 301-803, Form A

Materials

Dimensions [mm]

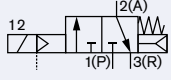

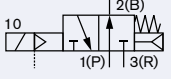

This dimensional drawing shows a valve in circuit function C with the port specifications P, R and A/B (manual override via port P). In circuit function D the manual override is located above the port A/B (pilot rotated 180° with respect to circuit function C). (Vacuum pump connected at port R, atmospheric pressure connected at port P)
