

Válvula de diafragma de 2/2 vías, cuerpo de forja, extremo soldado y conexión Tri-Clamp®, DN 8-100

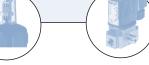

- · Separación hermética entre el fluido y el mecanismo de acción mediante diafragma
- Volumen muerto cero
- Distintos acabados superficiales

El Tipo 2031 puede combinarse con...

Accesorio 1062

Indicador de posición eléctrico

Limitador de carrera

Tipo 6012/6014P

Válvula de pilotaje NADA

TopControl TODO/

Tipo 8640/8644 Bloque de válvulas

Sensor/interruptor de presión

La válvula de diafragma con pilotaje externo consiste en un actuador de pistón de operación neumática, un diafragma y un cuerpo de válvula de 2 vías en acero inoxidable forjado.

El material estándar del actuador es PPS. Por sus favorables características de flujo y su volumen muerto cero, el cuerpo de la válvula admite caudales elevados y puede emplearse en aplicaciones muy variadas.

Aplicaciones

Farmacia

Biotecnología

Industria alimentaria

| Datos técnicos | |

Observaciones:

Para bajas presiones de trabajo recomendamos las versiones de muelle reducidas.

Velocidad de caudal: valor Kv en agua (m³/h)

Medido a $+20\,^{\circ}\mathrm{C}$ y a una presión de 1 bar a la entrada de la válvula, con la salida totalmente abierta.

Valores de presión (bar)

Presiones manométricas con respecto a la presión atmosférica.

Instalación para operación con autodrenaje

Materiales

DN 8-50

DN 65-100

Certificaciones

Adecuada para alimentos / aplicaciones estériles

- La composición de la membranas de EPDM y PTFE/EPDM corresponde al Code of Federal Regulations, publicado por la FDA (Food and Drug Administration, EE.UU.).
- Las membranas de EPDM corresponden a la Recomendación KTW (Plásticos para el sector de agua potable).
 Se proporcionará declaración del fabricante a petición.

 Las válvula de membrana cuentan con la aprobación 3-A (3-A Sanitary Standards Symbol Administrative Council)
