

## 2/2-way direct acting Solenoid Valve, normally closed

- High quality seal material
- High cycling rate
- Special versions up to 356°F (+180°C)
- Threaded port and sub-base connections
- Compact design

Type 6013 can be combined with...

**Type 2508**  
Cable plug

**Type 1078**  
Timer unit

**Type 2511**  
ASI cable plug

This direct-acting 2/2-way miniature solenoid valve is available in two versions.

### Standard version:

Type 6013 is a small direct acting solenoid valve for general purpose used for shut-off, dosing, filling, ventilating and for technical vacuum. It is of modular design and may be mounted individually or as a block on a multiple manifold.

### Analysis and vacuum technology:

Type 6013 A is a high-quality small solenoid valve for analysis and vacuum technology. It is manufactured under clean-room conditions. This includes thorough cleaning of all parts in contact with media from organic and inorganic substances. The limit for residual hydrocarbons is below 0.2 mg/dm<sup>3</sup>. 100 % of the valves are subjected to a special leakage test with regard to tight seating and tightness to the exterior. The permissible leakage rate is 10<sup>-4</sup> mbar l/s. The valve is used for shut-off, dosing, filling, ventilating and particularly for analysis technology.

### Circuit function A

2/2-way valve,  
normally closed by  
spring force

## Technical Data - Analytical version

<b>Analytical version</b>	Media flowing through are not contaminated
<b>Limit value for residual carbon</b>	< 0,2 mg/dm <sup>2</sup>
<b>Permissible leakage rate media</b>	10 <sup>-4</sup> mbar l/sec <ul style="list-style-type: none"> <li>▪ neutral media, which do not attack the body and seal materials</li> <li>▪ technical vacuum</li> </ul>
<b>Elec. connection</b>	tag connector acc. to DIN EN 175301-803 A (previously DIN43650) for cable plug Type 2508 (see accessories)
<b>Assembly note</b>	no oils, fats or silicone used during the assembly

**Solenoid valves for higher Requirements**

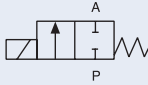

This version is suitable particularly for highly pure gaseous and liquid media. All media-affected parts are submitted to additional purification processes, so that the media is not contaminated under any circumstances. The assembly takes place under clean-room conditions.

The tightness test takes place at the Helium leak detector from a min. of 10<sup>-4</sup> mbar l/sec.

## Block assembly

## Ordering chart for assembly

Accessory part	Quantity of valve places				Item no.
Single manifold	in Aluminium				613 827
Multiple manifold	in Aluminium	Hole spacing A [mm]	Total length B [mm]	Hole spacing C [mm]	
	2	57	65	–	006 104
	3	90	98	–	613 828
	4	123	131	–	006 106
	5	156	164	57	613 829
	6	189	197	57	613 598
	8	255	263	57	613 831
Connector nipple	with O-Ring, to connect multiple manifolds				005 040
Covering plate	with screws and FKM O-ring for covering unoccupied valve positions				006 193

With manifold mounting, please comply with the permissible duty cycle (5 W models with 100% continuous rating or 8 W model with 60% duty cycle). The pressure port for the manifold is designated with P (R), and the outlet port with A (B). Only connect together ports with the same designation.

2/2-way valves of Type 6013 can be operated together on a manifold with 3/2-way valves of Type 6014, circuit function C (not D or TI) if the operating pressures agree according to the rating plates. The manifolds can also be expanded if the valve functions are taken into consideration. Connector nipples with O-rings are used to connect the P (R) ports.

**Caution!**

Unused, open valve ports must be closed off with covering plates (see Accessories).

## Ordering chart for accessories

The flat seal and the fixing screw are included in the delivery.
