

Pressure transmitter with CANopen interface

- Ceramic thick film or metallic thin film strain gauge measuring principles
- Process connections: G, NPT in ¼" or G ¾" (with hygienic flush diaphragm) or 1½" clamp
- Linearised and temperature-compensated measuring ranges from -1...5 bar or 0...0.25 bar to 0...16 bar selectable, relative pressure
- Media temperature range depends on the measuring principle: -20...+85 °C (ceramic), -40...+125 °C (metallic)
- Access to measured value, device status and settings via the CANopen interface

Product variants described in the data sheet may differ from the product presentation and description.

Can be combined with

	Type ME43 Fieldbus gateway	▶
	PLC With CANopen interface	

Integration into CANopen and bus networks

Type description

The product is used for measuring either relative or absolute pressures (on request) in liquid and gaseous media.

Two techniques are available:

- Metallic thin film strain gauge
- Ceramic thick film strain gauge

Both have different specifications. The main differences are:

- Available pressure measuring ranges
- Limitations of medium temperature
- Available process connection types and sizes
- With/without seal for process connection
- Flush diaphragm option available

The device digitises the pressure value and makes it available for use through the "CANopen" digital communication interface (CAN slave).

Instead of an analogue output, this device offers the CANopen digital interface. This allows bidirectional data transfer, e.g. with a CAN/Ethernet gateway or directly to a PLC that is equipped with a CAN interface. CAN devices can also be connected to the Bürkert bus digital communication interface. A driver used for data exchange and settings of the 8312 is integrated in the Bürkert PC tool Communicator and available on our website.

Several useful auxiliary functions have been implemented through the DS 404 device profile.

1. General Technical Data

Product properties	
Material	
Non wetted parts	
Housing	Stainless steel 1.4305 (303)
Wetted parts	
Process connection	<ul style="list-style-type: none"> • Ceramic version: stainless steel 1.4305 (303) • Metallic G or NPT version: stainless steel 1.4571 (316Ti) • Metallic clamp version: stainless steel 1.4435 (316L)
Measurement element	<ul style="list-style-type: none"> • Ceramic version: ceramic Al₂O₃ (96 %) • Metallic version: stainless steel 1.4435 (316L)
Seal	<ul style="list-style-type: none"> • Ceramic version: FPM (FFPM on request) • Metallic version: none
Dimensions	Detailed information can be found in chapter "3. Dimensions" on page 6.
Surface quality	
For clamp connection	Ra < 0.8 µm
Measurement technology	<ul style="list-style-type: none"> • Ceramic thick film strain gauge • Metallic thin film strain gauge
Measured variable	Relative pressure (absolute pressure on request)
Measuring range	-1...5 or 0...0.25; 1; 1.6; 2.5; 4.0; 6.0; 10.0 or 16.0 bar Detailed information can be found in chapter "6.3. Ordering chart" on page 9.
Compensated ambient temperature range (T _{amb.})	-20...+85 °C (-4...+185 °F)
Monitoring	<ul style="list-style-type: none"> • Measuring circuit <ul style="list-style-type: none"> – Underrange (freely selectable lower limit) – Overrange (freely selectable upper limit) • Probe short circuit • Probe break
Weight	95 g with process connection G ¼"
Performance data	
Temperature coefficient (Tc)	
Average Tc of zero	In compensated T ^o _{amb.} range <ul style="list-style-type: none"> • Ceramic version: ≤ 0.02 % / °C typical, ≤ 0.04 % / °C max. • Metallic version: <ul style="list-style-type: none"> – ≤ 0.03 % / °C typical, ≤ 0.05 % / °C max. for measuring ranges ≤ 0.4 bar – ≤ 0.02 % / °C typical, ≤ 0.04 % / °C max. for measuring ranges > 0.6 bar
Average Tc of measuring span	<ul style="list-style-type: none"> • Ceramic version: ≤ 0.02 % / °C typical, ≤ 0.04 % / °C max. • Metallic version: ≤ 0.02 % / °C typical, ≤ 0.04 % / °C max.
Thermal hysteresis	<ul style="list-style-type: none"> • Ceramic version: ≤ ± 0.4 % of measuring span • Metallic version: <ul style="list-style-type: none"> – ≤ ± 0.5 % of measuring span (in compensated temperature range) – ≤ ± 1 % of measuring span for range 0...0.25 bar
Zero offset	≤ 0.3 % of measuring span
Cycle time	1 ms
Measuring resolution	12 Bit
Overload limit	3 x measuring span
Burst pressure	4 x measuring span Detailed information on burst pressure can be found in chapter "6.3. Ordering chart" on page 9.
Measurement deviation	Related to characteristic curve: ≤ 0.5 % of measuring span (limit point setting)
Hysteresis	<ul style="list-style-type: none"> • Ceramic version: ≤ 0.2 % of measuring span • Metallic version: ≤ 0.1 % of measuring span
Repeatability	<ul style="list-style-type: none"> • Ceramic version: ≤ 0.1 % of measuring span • Metallic version: ≤ 0.05 % of measuring span

Stability (per year)	<ul style="list-style-type: none"> • Ceramic version: $\leq 1\%$ of measuring span • Metallic version: $\leq 0.5\%$ of measuring span
Electrical data	
Operating voltage	10...30 V DC, filtered and regulated
Power source (not supplied)	The auxiliary energy of the pressure sensor must meet SELV requirements; optionally, an energy-limited current circuit according to section 9.3 of DIN EN 61010-1 and UL 61010-1 can be used.
Current consumption	Max. approx. 45 mA
DC reverse polarity protection	Yes
Overvoltage protection	Yes
Short circuit protection	Yes
Cable	5-wire shielded cable, length depends on the transmission speed. The physical CAN transmission is standardized according to ISO 11898-2 (high-speed) and ISO 11898-3 (low-speed)
Medium data	
Fluid	Liquid and gaseous medium
Fluid temperature	<ul style="list-style-type: none"> • Ceramic version: $-20\dots+85\text{ °C}$ ($-4\dots+185\text{ °F}$) • Metallic version: $-40\dots+125\text{ °C}$ ($-40\dots+257\text{ °F}$)
Process/Port connection & communication	
Process connection	<ul style="list-style-type: none"> • Ceramic version: G ¼" or NPT ¼" (according to EN 837) • Metallic version: <ul style="list-style-type: none"> – G ¼" or NPT ¼" (according to EN 837) – G ¾" flush diaphragm (according to ISO 228-1) – Clamp 1½" (according to ISO 2852) <p>Detailed information on the process connection can be found in chapter "6.3. Ordering chart" on page 9.</p>
Electrical connection	M12 x 1 male connector, 5 pin according to DIN IEC 60947-5-2
Digital communication: CANopen	
Protocol	CiA DS 301, V4.02, CANopen slave
Profile	CiA DS 404, V1.2; measuring devices and closed-loop controllers
Baud rate	20 kbaud to 1 Mbaud, setting via LSS or SDO
Node ID	1 to 127, setting via LSS or SDO
PDO	0 Rx, 1 Tx
SDO	1 Rx, 1 Tx
Emergency	Yes
Heartbeat	Yes
Node Guarding	Yes
LSS	Yes
SYNC	Yes
Operation and project design	All parameters are accessible via the CANopen object directory (EDS) and can be set via standard CANopen software tools or Bürkert Communicator.
EDS (electronic data sheet)	<ul style="list-style-type: none"> • Device driver in Bürkert Communicator tool Type 8920, see "Bürkert Communicator" on the website in the Software chapter Type 8920 ▶. • See "Device Description Files" on the website in the Software chapter Type 8312 ▶.
Factory setting	See "Operating Instructions Type 8312" on the website in the User Manuals chapter Type 8312 ▶.
Approvals and certificates	
Standards	
Degree of protection	IP67 according to IEC/EN 60529, with M12 female connector screwed on
Directives	
CE directives	The applied standards, which verify conformity with the EU Directives, can be found on the EU Type Examination Certificate and/or the EU Declaration of conformity (if applicable)
Electromagnetic compatibility (EMC)	CE conformity according to EN 61326-2-3 <ul style="list-style-type: none"> • Interference emission: class B • Immunity to interference: to industrial requirements

Pressure equipment directives

- The device does not meet the requirements for “safety accessories” within the meaning of the Pressure Equipment Directive 2014/68/EU.
- Complying with Article 4, Paragraph 1 of 2014/68/EU directive
Detailed information on the pressure equipment directive can be found in chapter “2.1. Pressure Equipment Directive” on page 5.

Environment and installation

Ambient temperature

Operation	-20...+85 °C (-4...+185 °F)
Storage	-40...+85 °C (-40...+185 °F)
Relative air humidity	<ul style="list-style-type: none"> • During operation: ≤ 100 %, without condensation on the outer housing surface of the device • During storage: ≤ 90 %, without condensation
Climate class	3K7 according to EN 60721-3-3
Area of use	Indoors and outdoors (protect this device against electromagnetic interference, ultraviolet rays and the effects of climatic conditions)
Vibration resistance	20 g max. with 15...2000 Hz according to EN 60068-2-6
Shock resistance	100 g, 5 ms according to EN 60068-2-27
Mounting position	<ul style="list-style-type: none"> • Installation: unrestricted • Calibration: device upright, process connection at the bottom

2. Approvals

2.1. Pressure Equipment Directive

The device conforms to Article 4, Paragraph 1 of the Pressure Equipment Directive 2014/68/EU under the following conditions:

Device used on a pipe

Note:

- The data in the table is independent of the chemical compatibility of the material and the fluid.
- PS = maximum admissible pressure, DN = nominal diameter of the pipe

Type of fluid	Conditions
Fluid group 1, Article 4, Paragraph 1.c.i	DN ≤ 25
Fluid group 2, Article 4, Paragraph 1.c.i	DN ≤ 32 or PS*DN ≤ 1000
Fluid group 1, Article 4, Paragraph 1.c.ii	DN ≤ 25 or PS*DN ≤ 2000
Fluid group 2, Article 4, Paragraph 1.c.ii	DN ≤ 200 or PS ≤ 10 or PS*DN ≤ 5000

Device used on a vessel

Note:

- The data in the table is independent of the chemical compatibility of the material and the fluid.
- PS = maximum admissible pressure, V = vessel volume

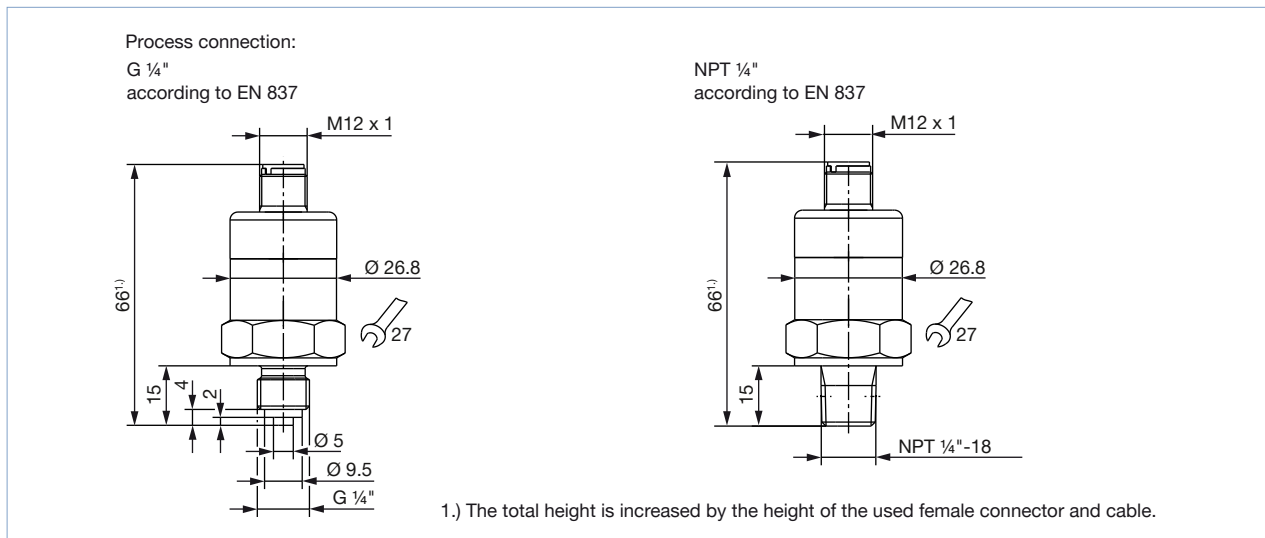

Type of fluid	Conditions
Fluid group 1, Article 4, Paragraph 1.a.i	V > 1 L and PS*V ≤ 25 bar.L or PS ≤ 200 bar
Fluid group 2, Article 4, Paragraph 1.a.i	V > 1 L and PS*V ≤ 50 bar.L or PS ≤ 1000 bar
Fluid group 1, Article 4, Paragraph 1.a.ii	V > 1 L and PS*V ≤ 200 bar.L or PS ≤ 500 bar
Fluid group 2, Article 4, Paragraph 1.a.ii	PS > 10 bar and PS*V ≤ 10000 bar.L or PS ≤ 1000 bar

3. Dimensions

3.1. Ceramic version

Note:

Dimensions in mm

3.2. Metallic version

4. Product operation

4.1. Functional overview

No.	Description
1	The analog signal from the pressure cell is digitized with 12 Bit resolution.
2	The pressure signal is digitally calibrated at the factory.
3	The sensor monitoring facility continuously checks the correct performance of the sensor signal and triggers high priority emergency telegrams in the event of an error.
4	The pressure measurement can be scaled to any dimensional unit (or in % of range).
5	Fine calibration features and auto-zeroing function and a freely adjustable shift of the characteristic.
6	Undesirable signal fluctuations can be suppressed through the constant (adjustable) filter.
7	The measurement output has a freely selectable decimal place.
8	Free choice of upper and lower limits for range monitoring. The result is given as a status byte in addition to the measurement in the PDO frame.
9	The drag pointer ("min./max. index") function records the minimum and maximum pressure values.
10	Date and name of the last servicing action can be stored.
11	An emergency telegram is triggered in the event of a sensor fault.
12	The PDO frame contains a 32-bit measurement and a 8-bit status. The measurement output can be controlled by means of different trigger conditions.
13	Parameters can be set through SDO frames, and measurements and status can be requested.
14	The heartbeat signal or Node Guarding can be used to additionally monitor the transmitter function.
15	The transmission of measurements can be controlled through the Sync command.
16	NMT frames serve to control the operational state of the transmitter.
17	The CAN Node ID and CAN baud rate are set via LSS or SDO, according to choice.

5. Product accessories

Note:

To set up a device, please use the USB-büS interface Type 8923 in combination with the Bürkert software tool Communicator Type 8920.

See **Software manual Type 8920** ▶ for more information.

Accessories	No.	Description
	1	Quick-Start
	2	Power supply:100...240 V AC/24 V DC 1 A and adaptors for power supply worldwide use
	3	büS terminating resistor on büS Y-splitter
	4	5 pin M12 male connector wired on free end cable
	5	büS connection cable with 5 pin M12 plug, micro USB B plug
	6	büS adapter with 5 pin M12 plug, A-coded to 5 pin M12 plug, A-coded
	7	büS stick (USB to büS/CANopen adaptor)
	8	büS service cable with 5 pin M12 plug, mini USB and circular plug-in connectors for power supply
	9	Magnetic key
	10	CD - Communicator (30-day license without registration, update and licensing over Bürkert home page). It is recommended to download and install the Communicator software from the homepage to use the latest version.

6. Ordering information

6.1. Bürkert eShop – Easy ordering and quick delivery

Bürkert eShop – Easy ordering and fast delivery

You want to find your desired Bürkert product or spare part quickly and order directly? Our online shop is available for you 24/7. Sign up and enjoy all the benefits.
