The design of the System Type 8802 Continuous CLASSIC enables the easy integration of digital automation modules whether they are simple Positioner BASIC, high-capacity Positioner with optional integrated fieldbus interface or even a digital Process Controller with easy handling thanks to the backlighting of the graphics display.

The fully integrated system with control valve and automation system has a compact and smooth design, integrated pneumatic lines, IP65/67/NEMA4X protection class and superior chemical resistance.

### Ordering information for valve system Continuous CLASSIC Type 8802-YC

A valve system Continuous CLASSIC Type 8802-YC consists of an angle-seat control valve Type 2702 and a digital electropneumatic positioner Type 8692, a digital electropneumatic process controller Type 8693, a digital electropneumatic positioner BASIC Type 8694 (below), an electropneumatic positioner SideControl Type 8792/8793 and Type 8635 (next page) (see separate datasheets).

You order two components and receive a complete assembled and certified valve.

Click on the orange box "More info." below... you will come to our website for the resp. product where you can download the datasheet.
