

2/2-way diaphragm valve with pneumatic actuator in stainless steel (Type INOX)

- Valve body and diaphragm are available in various materials and variants
- Wetted surfaces from $Ra \leq 0.38 \mu m \dots \leq 1.6 \mu m$ (optionally electropolished)
- Available in all common connection sizes and variants

Product variants described in the data sheet may differ from the product presentation and description.

Can be combined with

	Type SV02 Diaphragms	▶
	Type 2034 Multifunction block solutions	▶
	Type 2933 2/2-way diaphragm valve with manually operated actuator (basic)	▶
	Type 2036 Robolux multiway diaphragm valve, pneumatically operated	▶

Type description

The externally controlled diaphragm valve, Type 2063, consists of a pneumatically operated stainless steel piston actuator, a diaphragm and a 2-way body. The proven and robust actuator with stainless steel valve body ensures use under hygienic or aggressive environmental conditions. The flow-efficient valve body with little dead space enables high flow rates and a wide range of possible uses. The valve body and the diaphragm are available in all common materials and variants. The actuator has a compact, autoclavable design with a large stainless steel body, high temperature resistance and gap-free seals. The integration of the automation units 8697 is possible in all expansion stages (can be retrofitted). The actuator is provided with an integrated, optical position indicator as standard.

2. Approvals and conformities

2.1. General notes

- The approvals and conformities listed below must be stated when making enquiries. This is the only way to ensure that the product complies with all required specifications.
- Not all available versions can be supplied with the below mentioned approvals or conformities.

2.2. Conformity

In accordance with the Declaration of Conformity, the product is compliant with the EU Directives.

2.3. Standards

The applied standards which are used to demonstrate compliance with the EU Directives are listed in the EU-Type Examination Certificate and/or the EU Declaration of Conformity.

3.3. Example of available membrane materials

The diaphragms have been developed to meet the unique challenges of hygienic and sterile requirements. Bürkert offers diaphragms with precise material composition and high accuracy. Bürkert diaphragms are available in a wide range of materials which have been tested and proven in applications in the food and beverage, biotechnology, pharmaceutical and cosmetics industries. The diaphragms are tested during development and production to ensure reliability under difficult process conditions.

5.1. Flow characteristics

Note:

- The K_v values may vary slightly with different actuator sizes and diaphragm materials.
- More K_v values are available on request.
- Flow rate: K_v value water (m³/h) for elastomer diaphragm
- Measurement at +20 °C, 4 bar at valve inlet and 3 bar at valve outlet

7. Networking and combination with other Bürkert products

Note:

The **On/Off valve system** with **stainless steel actuator Type 8801-DV** consists of a **diaphragm valve Type 2063** and an **electrical position feedback Type 8697**.

You order two components and receive a completely assembled and tested valve.
