

## 2671 centric type

### Butterfly Valve, rubber seated

- Pressure rating: bidirectional shut-off (150 PSI standard, 230 PSI optional)
- ISO 5211 direct actuator mount
- Wafer, lug, and flange mount
- Range of body, disc, and seat options

Type 2671 can be combined with...

**Type 6519 NAMUR**

Pilot valve, direct mount to actuator

**Type 2051**

Pneumatic rotary actuator

**Type 3003**

Electric rotary actuator

**Type 3004**

Electric explosion proof actuator

**Type 3005**

Electric rotary actuator

**Type 8792**

Positioner

The Burkert Centric type butterfly valve has many configurations available to meet a wide range of applications. The 2671 Centric type is automation ready with an ISO 5211 mounting pad and stem for direct coupling of the actuator. A full range of actuators, pilot valves, digital positioners, feedback switches and bus network options are available for integration in plant process control systems.

#### Technical data

<b>Valve size</b>	1 1/2"-40" (wafer), 1 1/2"-24" (lug), 14"-48" (flanged)
<b>Body materials</b>	Cast iron, ductile iron, stainless steel, alu-bronze
Disc material	Ductile iron (Nylon 11 Coated), stainless steel (304 SS, 316 SS)
Seat material	NBR, EPDM, EPT, neoprene, silicon, CSM, FKM
Stem material	410 SS, 604 SS, 316 SS
<b>Media</b>	Compatible with the materials of construction, and the pressure, temperature limits of the seals and disc
<b>Media temperature</b>	-4°F to 400°F based on valve seat limit
<b>Connections</b>	Wafer, lug, flange
<b>Installation</b>	As required
<b>Pressure rating</b>	Bidirectional bubble-tight shut-off to 150 PSI, 230 PSI (optional)

## Technical data (continued)

---

### Face to face:

Valve body are designed to meet ISO 5752 table 5 short.

### Top works:

24" and below, valve mounting flange and stem shall be per ISO 5211.

28" and above, valve mounting flange per ISO 5211, stem shall be round keyed.

### Flange requirement:

*Wafer style, lug style:* ANSI 125/150. BS Table E. JIS 10K. DIN PN10. DIN PN16.

All wafers have locating holes for ease of installation.

*Flange style:* ANSI 150. JIS10K. DIN PN10. DIN PN16

### Pressure rating:

Bi-directional bubble-tight shut off to	230 PSI – 1 1/2" to 24"
	150 PSI – 26" to 40"

and tested to 110% of full rating	260 PSI – 1 1/2" to 24"
	160 PSI – 26" to 40"

### Shell testing:

The body strength can stand 150% of full rating.

340 PSI – 1 1/2" to 24"

220 PSI – 26" to 40"

### Installation instructions:

The valve is designed for using between all types of flat or raised face flanges. DO NOT USE FLANGE GASKETS. The butterfly valve design eliminates the need for gaskets. For proper installation, the space between flanges must be sufficient to permit valve insertion without disturbing the rubber liner flange seal. Note that the disc sealing edge is in line with the flat of the shaft. Rotate the stem to position the disc within the body, place the valve between flanges and hand-tighten the bolts. SLOWLY OPEN the valve counterclockwise to check for adequate disc clearance. RETURN THE DISC TO 10% OPEN POSITION and cross tighten all bolts, again check for adequate disc clearance.

### Stem retaining mechanism:

The stem is retained in the body by means of a special "Q" type design when the valve size is under 14", and hence the stem can be removed from the body and disc without any special tools.

\*Unless you do intend to disassemble the valve, otherwise do not position the disc around 135°

### Anti-Condensed:

(On customer's requirement)

Cv values – valve sizing coefficient

To use the torque chart, note the following:

- 1) Seating/Unseating torque values above included friction bearing torque for stated ΔP.
- 2) Do not apply a safety factor to above torque values when determining actuator output torque requirement.

Materials

Burkert offers a new line of butterfly valves with stainless steel investment cast bodies (1) and discs (2) from size 1 1/2" up to 12" in both wafer and lug styles. This line of valves has the same design features of 2671 wafer/lug style valve, plus the advantage of parts like RTFE+SS316 bushings (8), stem retainer (9), stainless steel lever operator set, and gear box, etc.; to reach a high integrity corrosion resistance exterior for use in aggressive environments.

Antistatic device (10.11) has to be equipped with this valve, since the valve disc and stem was isolated by rubber liner and stem bushings. It will collect the static, which resulted by the friction between the fluids and disc. In order to prevent the dangers caused by static, the antistatic device is required.

Item	Part name	Materials	Specifications		Comments
			JIS	ASTM	
1	Body	Stainless steel	SCS 13A	A351 Gr. CF8	
			SCS 14A	A351 Gr. CF8M	
2	Disc	Stainless steel	SCS 13A	A351 Gr. CF8	
			SCS 14A	A351 Gr. CF8M	
3	Seat	NBR (Nitrile)	-	-	14°F to 176°F (-10°C to 80°C)
		EPDM	-	-	-4°F to 248°F (-20°C to 120°C)
		EPT	-	-	-4°F to 284°F (-20°C to 140°C)
		Neoprene (CR)	-	-	32°F to 176°F (0°C to 80°C)
		Silicon	-	-	-4°F to 356°F (-20°C to 180°C)
		CSM	-	-	-4°F to 275°F (-20°C to 135°C)
		FKM	-	-	-0.4°F to 400°F (-18°C to 204°C)
4	Stem	Stainless steel	SUS 410	A182 Gr. F6A	
			SUS 304	A182 Gr. F304	
			SUS 316	A182 Gr. F316	
5	Pin	Stainless steel	SUS 304	A182 Gr. F304	
6	Bush	Delrin	-	-	
7	O-ring	NBR (Nitrile)	-	-	
8	Bush	RPTFE+Stainless steel	RPTFE+SUS316	RPTFE+A240 Gr. 316	
9	Stem retainer	Stainless steel	SUS 304	A240 Gr. F304	
10	Pin (anti-static)	Stainless steel	SUS 304	A182 Gr. F304	
11	Spring	Stainless steel	SUS 304	A182 Gr. F304	
12	Screw	Stainless steel	SUS 304	A193 Gr. B8

Notes:

Flange Class ANSI 150

D/A = Double Acting

S/R = Spring Return

F/O = Fail Open

F/C = Fail Closed

See electric actuator datasheet for complete options.
