

### Direct-acting 2-way standard solenoid control valve

- Excellent range
- Very good response
- Compact valve design
- Orifice sizes 0.05 ... 2.0 mm
- Port connection 1/8" or sub-base

Product variants described in the data sheet may differ from the product presentation and description.

#### Can be combined with

	<b>Type 8605</b> PWM control electronics for electromagnetic proportional valves	▶
	<b>Type 2507</b> Cable plug, form B according to industry standard	▶
	<b>Type 8611</b> eCONTROL – Universal controller	▶

#### Type description

The direct-acting solenoid control valve Type 2871 is used as the regulating unit in control loops. Due to an elastomeric seat seal the valve closes tight (integrated shut-off function) ,up to the DN specific nominal pressure. The plunger of the valve is assembled frictionless, which leads to an extraordinary adjustment characteristic. This valve is particularly suitable for demanding control tasks (high control range, dry gases, etc.).

## 1. General technical data

Product properties	
Dimensions	Further information can be found in chapter "5. Dimensions" on page 5.
Material	
Seal	FKM, EPDM
Body	Brass, stainless steel
Circuit functionS	A Further information can be found in chapter "2. Circuit functions" on page 3.
Performance data	
Typical values of positioning behaviour <sup>1.)</sup>	
Hysteresis	< 5 %
Repeat accuracy	< 0.25 % of end value <sup>2.)</sup>
Response sensitivity	< 0.25 % of end value <sup>2.)</sup> < 0.1 % of end value <sup>2.)</sup> with DN < 0.8 mm
Setting range	1:200: DN 0.8...2 1:500: DN 0.05...0.6
Actuating time (10...90 %)	< 15 ms
Pressure range <sup>3.)</sup>	0...12 bar (also applicable for technical vacuum)
Duty cycle	100 % continuous operation
Electrical data	
Operating voltage	24 V DC (12 V on request)
Power consumption	Max. 5 W
Maximum coil current <sup>4.)</sup>	220 mA (at 5 W and 24 V coil)
PWM frequency <sup>5.)</sup>	1500 Hz
Medium data	
Operating medium	Neutral gases, liquids on request
Medium temperature	-10 °C...+90 °C (with FKM) -30 °C...+90 °C (with EPDM)
Viscosity	Max. 21 mm <sup>2</sup> /s (21 cSt)
Process/Port connection & communication	
Electrical connection	Cable plug <b>Type 2507</b> ▶, form B according to industry standard Further information can be found in chapter "Cable plug Type 2507, form B according to industry standard" on page 13.
Port connection size	Sub-base, G 1/8, NPT 1/8
Approvals and conformities	
Degree of protection	IP65
North America (USA/Canada)	Further information can be found in chapter "3.4. North America (USA/Canada)" on page 4.
Foods and beverages/Hygiene	Further information can be found in chapter "3.5. Foods and beverages/Hygiene" on page 4.
Environment and installation	
Installation position	As required, preferably with actuator upright
Ambient temperature	Max. +55 °C

1.) Characteristic data of control behaviour depends on process conditions.

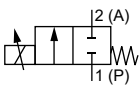

2.) By flow measurement

3.) Pressure data: overpressure to atmospheric pressure, depending on nominal diameter, tightness seal or nominal pressure

4.) Maximum value: value depends on operating pressure

5.) PWM: pulse width modulation

## 2. Circuit functions

Symbol	Description
	<b>Circuit function A (CF A)</b> 2/2-way solenoid proportional control valve Direct-acting Normally closed

### 3. Approvals and conformities

#### 3.1. General notes

- The approvals and conformities listed below must be stated when making enquiries. This is the only way to ensure that the product complies with all required specifications.
- Not all available versions can be supplied with the below mentioned approvals or conformities.

#### 3.2. Conformity

In accordance with the Declaration of conformity, the product is compliant with the EU Directives.

#### 3.3. Standards

The applied standards which are used to demonstrate compliance with the EU Directives are listed in the EU-Type Examination Certificate and/or the EU Declaration of Conformity.

#### 3.4. North America (USA/Canada)

Approval	Description
	<p><b>Optional: UL Recognized for the USA <sup>1)</sup></b>                      The products are UL Recognized for the USA according to:</p> <ul style="list-style-type: none"> <li>• UL 429 (Electrically operated valves)</li> </ul>

1.) This device is intended to be used with a NEC Class 2 power source or NEC Class 2 transformer in accordance with UL1310 or UL1585.

#### 3.5. Foods and beverages/Hygiene

Conformity	Description
<b>USP</b>	<p><b>United States Pharmacopeial Convention (USP) (valid for the variable code PL04)</b>                      All wetted materials are biocompatible according to the manufacturer's declaration.</p>
<b>FDA</b>	<p><b>FDA – Code of Federal Regulations (valid for the variable code PL02, PL03)</b>                      All wetted materials are compliant with the Code of Federal Regulations published by the FDA (Food and Drug Administration, USA) according to the manufacturer's declaration.</p>
	<p><b>EC Regulation 1935/2004 of the European Parliament and of the Council (valid for the variable code PL01, PL02)</b>                      All wetted materials are compliant with EC Regulation 1935/2004/EC according to the manufacturer's declaration.</p>

### 4. Materials

#### 4.1. Bürkert resistApp

#### Bürkert resistApp – Chemical resistance chart

You want to ensure the reliability and durability of the materials in your individual application case? Verify your combination of media and materials on our website or in our resistApp.

## 6. Performance specifications

### 6.1. Flow characteristic

#### Determination of the $K_v$ value

Pressure drop	$K_v$ value for liquids [m <sup>3</sup> /h]	$K_v$ value for gases [m <sup>3</sup> /h]
<b>Sub-critical</b> $p_2 > \frac{p_1}{2}$	$= Q \sqrt{\frac{\rho}{1000 \Delta p}}$	$= \frac{Q_N}{514} \sqrt{\frac{T_1 \rho_N}{p_2 \Delta p}}$
<b>Supercritical</b> $p_2 < \frac{p_1}{2}$	$= Q \sqrt{\frac{\rho}{1000 \Delta p}}$	$= \frac{Q_N}{257 p_1} \sqrt{T_1 \rho_N}$

Value	Description	Unit
$K_v$	Flow coefficient	[m <sup>3</sup> /h] <sup>1.)</sup>
$Q_N$	Standard flow rate	[m <sup>3</sup> /h] <sup>2.)</sup>
$p_1$	Inlet pressure	[bar] <sup>3.)</sup>
$p_2$	Outlet pressure	[bar] <sup>3.)</sup>
$\Delta p$	Differential pressure $p_1 \dots p_2$	[bar]
$\rho$	Density	[kg/m <sup>3</sup> ]
$\rho_N$	Standard density	[kg/m <sup>3</sup> ]
$T_1$	Medium temperature	[(273+t)K]

1.) Measured for water,  $\Delta p = 1$  bar, over the value

2.) At reference conditions 1.013 bar and 0 °C (273 K)

3.) Absolute pressure

### 6.2. Exemplary characteristic curve of a proportional valve

#### Note:

In continuous flow applications, the choice of an appropriate valve size is much more important than with on/off valves. The optimum size should be selected such that the resulting flow in the system is not unnecessarily reduced by the valve. However, a sufficient part of the pressure drop should be taken across the valve even when it is fully opened.

Reference value:  $\Delta p$  valve > 25 % of the total pressure drop

Otherwise, an ideal, linear valve characteristic is deformed into a curved system characteristic.

If the differential pressure (difference between inlet and outlet pressure) exceeds half the value of the nominal pressure discontinuities may occur.

For that reason take advantage of Bürkert competent engineering services during the planning phase.

## 7. Product operation

### 7.1. Control unit

Valve control takes place through a PWM signal (pulse-width modulation). The duty cycle of the PWM signal determines the coil current and hence the position of the plunger.

The Bürkert control electronics Type 8605 (see data sheet **Type 8605** ▶) converts an analogue signal to a reference value corresponding to the valve type PWM signal and provides additional functions such as temperature compensation (coil heating), ramp function and the adjustment of min. and max. duty cycle/coil current for the control range.

Please note the sizing comments for such a control valve in chapter **“6.2. Exemplary characteristic curve of a proportional valve” on page 8**.

## 8. Ordering information

### 8.1. Bürkert eShop

**Bürkert eShop – Easy ordering and quick delivery**

You want to find your desired Bürkert product or spare part quickly and order directly? Our online shop is available for you 24/7. Sign up and enjoy all the benefits.

[Order online now](#)

### 8.2. Recommendation regarding product selection

**Note:**

- Use the product enquiry form (see **“8.4. Bürkert Product Enquiry Form” on page 9**) for information about the device layout and send it to us after completion.
- Please note the chapter **“6.2. Exemplary characteristic curve of a proportional valve” on page 8** on product selection.

### 8.3. Bürkert product filter

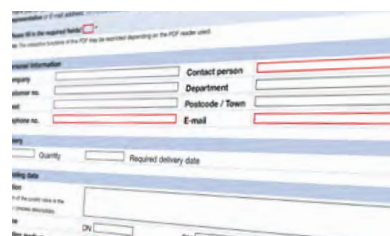

**Bürkert product filter – Get quickly to the right product**

You want to select products comfortably based on your technical requirements? Use the Bürkert product filter and find suitable articles for your application quickly and easily.

[Try out our product filter](#)

### 8.4. Bürkert Product Enquiry Form

**Bürkert Product Enquiry Form – Your enquiry quickly and compactly**

Would you like to make a specific product enquiry based on your technical requirements? Use our Product Enquiry Form for this purpose. There you will find all the relevant information for your Bürkert contact. This will enable us to provide you with the best possible advice.

1.) Measurement at + 20 °C, 1 bar pressure differential over a fully opened valve.

2.) Pressure data: overpressure to atmospheric pressure. If the differential pressure between the inlet and outlet pressure of the valve is greater than half of the nominal pressure, discontinuities in the valve characteristic curve are possible.
