- Energy-saving double coil technology with kick and drop variant

Product variants described in the data sheet may differ from the product presentation and description.

Can be combined with

	<p>Type 2518 Cable plug, form A according to DIN EN 175301 - 803</p>	▶
	<p>Type 2509 Cable plug, form A according to DIN EN 175301 - 803</p>	▶

Type description

The 5404 valve is a servo-assisted piston valve available in NC and NO versions. A minimum differential pressure is required for the valve switching function. The solenoid coils are moulded with high-quality epoxy resin. To reduce power consumption in operation, coils with "Kick and Drop" (KD) electronics assembly (double coil technology) are available. In combination with a plug to DIN EN 175301 - 803 Form A, the valves satisfy degree of protection IP65. The cable plug is not included and must be ordered separately.
