

2/2-way and 3/2-way Bürkert TwinPower rocker solenoid valve with separating diaphragm

- For highest chemical resistance requirements
- Ultra compact design due to Bürkert TwinPower actuator with 16 mm width/station
- DN 2.0 (3 bar) and DN 3.0 (2 bar)
- Integrated hit-and-hold electronics assembly
- High back-pressure tightness with excellent cleanability

Product variants described in the data sheet may differ from the product presentation and description.

Type 2505

10 mm socket for Bürkert small solenoid valves

Type description

From the fluidics perspective, Type 6626 combines the reliable and successful rocker principle. Due to the new Bürkert TwinPower concept, this actuator enables drastic reduction of installation space while maintaining performance output. Hence, the 16 mm wide medium separated rocker valve, with 3.0 mm DN and a pressure resistance of 2 bar, provides the same performance as a traditional 22 mm valve. In addition, the integrated power reduction decreases energy consumption by 75%. In combination with other design features, the heat transfer into the medium can be reduced to a minimum. With regard to the design, special attention has been placed on excellent cleanability and high reliability. By using high quality materials, Type 6626 is also ideal for handling aggressive medium. The valve is available as a 2/2-way and 3/2-way version.

4. Approvals and conformities

4.1. General notes

- The approvals and conformities listed below must be stated when making enquiries. This is the only way to ensure that the product complies with all required specifications.
- Not all available versions can be supplied with the below mentioned approvals or conformities.

4.2. Conformity

In accordance with the Declaration of Conformity, the product is compliant with the EU Directives.

4.3. Standards

The applied standards which are used to demonstrate compliance with the EU Directives are listed in the EU-Type Examination Certificate and/or the EU Declaration of Conformity.
