DATA SHEET

Type 8032

Flowmeter/threshold detector with paddle wheel

- Indication, monitoring, transmitting and On/Off control in one device
- Freely adjustable outputs (transistor or relay)
- Automatic calibration via teach-in
- Process value output: 4...20 mA
- Flow threshold detector

Product variants described in the data sheet may differ from the product presentation and description.

Can be combined with

Type 8792
Digital electropneumatic positioner SideControl

Type 2300
Pneumatically operated 2-way angle seat control valve ELEMENT

Type 8644
AirLINE SP electropneumatic automation system

Type description

The paddle wheel device Type 8032 is designed for use in clear, neutral or aggressive liquids. The device is provided as flowmeter or threshold detector.

The device is made up of a compact Inline sensor-fitting with paddle wheel (Type S030) and a transmitter with display (Type SE32). The device is quickly and easily assembled thanks to a bayonet mounting and locking system. The Bürkert "Inline quarter-turn" technology ensures a leakage-free operation.

The Bürkert designed sensor-fitting system ensures simple installation of the devices into all pipelines from DN 06...DN 65.

The device is available with freely configurable switching outputs (transistor or relay) or with 4...20 mA process value output. The switching outputs enable the direct switching of valves and the establishment of a simple On/Off control circuit within a monitoring system. The switching points can be configured with the 3 keys directly at the display.

1. General technical data

Note:
If the device is mounted in a humid environment or outside, then the maximum voltage allowed is **35 V DC** instead of 36 V DC.

Product properties	
Material	
Make sure the device materials are compatible with the fluid you are using. Further information can be found in chapter "3.1. Bürkert resistApp" on page 7.	
Further information on the materials can be found in chapter "3.2. Material specifications" on page 7.	
Non-wetted parts	
Front panel film	Polyester
Cover	PC, glass fibre reinforced
Housing	PC, glass fibre reinforced
Screw	Stainless steel
Bayonet system	PC
Female cable plug/male fixed plug	• Body, contact holders and cable gland in PA • Cable gland seal and flat seal in NBR
Fixed connector	PA or PA and CuZn, nickel-plated
Wetted parts	
Sensor armature	Brass, stainless steel, PVC, PP or PVDF (depending on the Inline sensor-fitting variant Type S030)
Axis and bearing	Ceramics (Al_2O_3)
Paddle wheel	PVDF
Sensor-fitting body	Brass, stainless steel, PVC, PP or PVDF (depending on the Inline sensor-fitting variant Type S030)
Seal	FKM or EPDM (depending on the Inline sensor-fitting variant Type S030)
Display	8-digit LCD with backlighting
Compatibility	Any pipe from DN 06...DN 65 which are fitted with Bürkert Type S030 Inline sensor-fitting. For the selection of the nominal diameter of the Inline sensor-fittings, see **data sheet Type S030** ▶.
Pipe diameter	DN 06...DN 65.
Dimensions	Further information can be found in chapter "4. Dimensions" on page 8
Measuring principle	Paddle wheel
Measuring range	• Flow rate: 0.5...1000 l/min (0.13...265 gpm) • Flow velocity: 0.3...10 m/s
Performance data	
Measurement deviation	• Teach-in: ± 1 % of the measured value [1.] at teach-in flow rate value • Standard K-factor: ± 3 % of the measured value [1.]
Linearity	± 0.5 % of full scale [1.]
Repeatability	± 0.4 % of the measured value [1.]
4...20 mA output uncertainty	± 0.5 % of current range
Operating mode	Threshold: window or hysteresis
Electrical data	
Operating voltage	12...36 V DC ± 10 %, filtered and regulated Connection to main supply: permanent (through external SELV (Safety Extra Low Voltage) and LPS (Limited Power Source) power supply)
Power source (not supplied)	Limited power source according to UL/EN 62368-1 standards or limited energy circuit according to UL/EN 61010-1 paragraph 9.4
Protection against DC polarity reversal	Yes
Current consumption	≤ 80 mA (no load)

DTS 1000010777 EN Version: - Status: RL (released | freigegeben | valide) printed: 28.10.2026

DTS 1000010777 EN Version: - Status: RL (released | freigegeben | valide) printed: 28.10.2026

Output	• Transistor – NPN and/or PNP, open collector – 700 mA max. (500 mA max. per transistor if both transistor outputs are wired) – frequency: 0...300 Hz – operation and thresholds can be parameterised – NPN-output: 0.2...36 V DC – PNP-output: power supply – protection against short circuits • Relay – operation and thresholds can be parameterised – non UL device: – single relay output: 250 V AC/3 A or 30 V DC/3 A – relay output and 4...20 mA current output: 48 V AC/3 A or 30 V DC/3 A – UL device: 30 V AC/42 V_{peak}/3 A or 60 V DC/1 A • Process value – 4...20 mA, galvanic insulation – loop impedance max.: 1300 Ω at 36 V DC, 1000 Ω at 30 V DC, 700 Ω at 24 V DC, 450 Ω at 18 V DC, 200 Ω at 12 V DC – response time (10...90 %): 3 s with filter 2 (default setting)
Voltage supply cable	Max. 100 m length, shielded • For female cable plug (supplied): – external diameter of wire: 6...7 mm – cross section of wires: 0.25...1.5 mm² • For 5-pin M12 female connector (not supplied): – external diameter of wire: 3...6.5 mm – cross section of wires: max. 0.75 mm² • For 8-pin M12 female connector (not supplied): – external diameter of wire: 5.9 mm – cross section of wires: 0.25 mm²
Medium data	
Fluid temperature	With Inline sensor-fitting Type S030 in: • PVC: 0...+ 50 °C (+ 32...+ 122 °F) • PP: 0...+ 80 °C (+ 32...+ 176 °F) • PVDF, stainless steel or brass: - 15...+ 100 °C (+ 5...+ 212 °F) See **data sheet Type S030** ▶ for more information.
Fluid pressure	With Inline sensor-fitting Type S030 in: • plastic: max. PN 10 • metal: max. PN 16 (PN 40 on request) See **data sheet Type S030** ▶ for more information.
Viscosity	300 cSt max.
Rate of solid particles	Max. 1 %
Maximum particle size	0.5 mm
Product connections	
Pipe connection	With Inline sensor-fitting Type S030 in: • Plastic: true union with nut and solvent/fusion socket, spigot or external thread • Metal: internal or external thread, weld ends, clamp or flange See **data sheet Type S030** ▶ for more information.
Electrical connection	• Cable plug according to DIN EN 175301-803, free positionable 5-pin M12 male connector or 8-pin M12 male connector
Approvals and conformities	
Directives	
CE directive	Further information on the CE Directive can be found in chapter "2.3. Standards" on page 6.
Pressure equipment directive	Complying with article 4, paragraph 1 of 2014/68/EU directive Further information on the pressure equipment directive can be found in chapter "2.4. Pressure Equipment Directive (PED)" on page 6.

North America (USA/Canada)	UL Recognized for the USA and Canada
Environment and installation	
Ambient temperature	Operation and storage: -10...+60 °C (+14...+140 °F)
Relative air humidity	≤ 80 %, without condensation
Height above sea level	Max. 2000 m
Operating condition	Continuous
Equipment mobility	Fixed
Application range	Indoor and outdoor Protect the device against electromagnetic interference, ultraviolet rays and, when installed outdoors, against the effects of climatic conditions.
Degree of protection [2.] according to IEC/EN 60529	IP65 with the following conditions met: • device wired • connectors mounted and tightened or sealed
Installation category	Category I according to UL/EN 61010-1
Pollution degree	Degree 2 according to UL/EN 61010-1

1.) Under reference conditions i.e. measuring medium = water, ambient and water temperature = + 20 °C (+ 68 °F), observing the minimum the minimum inlet and outlet sections and the appropriate inner diameter of the pipe.

2.) Not evaluated by UL

DTS 1000010777 EN Version: - Status: RL (released | freigegeben | valide) printed: 28.10.2026

2. Approvals and conformities

2.1. General notes

- The approvals and conformities listed below must be stated when making enquiries. This is the only way to ensure that the product complies with all required specifications.
- Not all available variants can be supplied with the below mentioned approvals or conformities.

2.2. Conformity

In accordance with the Declaration of Conformity, the product is compliant with the EU Directives.

2.3. Standards

The applied standards which are used to demonstrate compliance with the EU Directives are listed in the EU-Type Examination Certificate and/or the EU Declaration of Conformity.

2.4. Pressure Equipment Directive (PED)

The device conforms to Article 4, Paragraph 1 of the Pressure Equipment Directive 2014/68/EU under the following conditions:

Device used on a pipe

Note:

- The data in the table is independent of the chemical compatibility of the material and the fluid.
- PS = maximum admissible pressure, DN = nominal diameter of the pipe

Type of fluid	Conditions
Fluid group 1, Article 4, Paragraph 1.c.i	DN ≤ 25
Fluid group 2, Article 4, Paragraph 1.c.i	DN ≤ 32 or PS*DN ≤ 1000
Fluid group 1, Article 4, Paragraph 1.c.ii	DN ≤ 25 or PS*DN ≤ 2000
Fluid group 2, Article 4, Paragraph 1.c.ii	DN ≤ 200 or PS ≤ 10 or PS*DN ≤ 5000

2.5. North America (USA/Canada)

Approval	Description
c UL us	**Optional: UL Recognized for the USA and Canada** The products are UL Recognized for the USA and Canada according to: • UL 61010-1 (ELECTRICAL EQUIPMENT FOR MEASUREMENT, CONTROL, AND LABORATORY USE – Part 1: General Requirements) • CAN/CSA-C22.2 No. 61010-1

DTS 1000010777 EN Version: - Status: RL (released | freigegeben | valide) printed: 28.10.2026

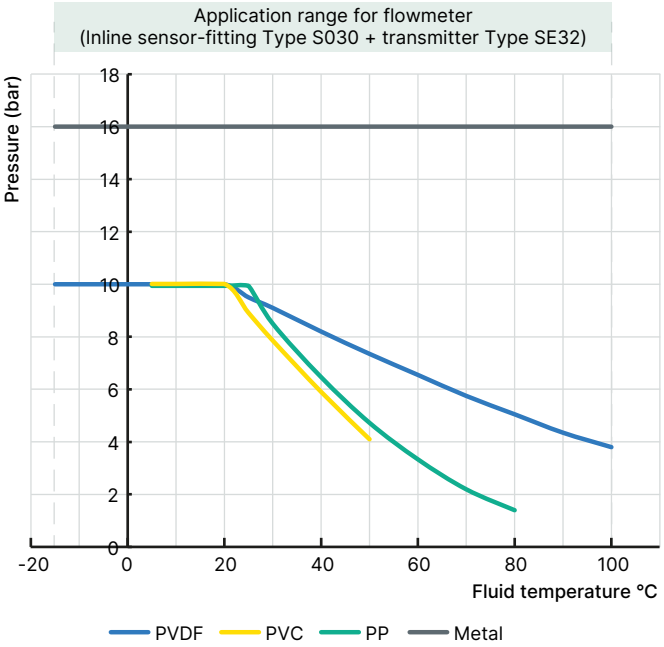
5. Performance specifications

5.1. Pressure temperature diagram



6. Product installation

6.1. Installation notes

Flow measurement

Note:
The device is not suitable for use in gaseous media and steam.

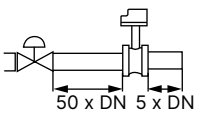
Minimum straight distances upstream and downstream of the sensor must be observed. These stabilizing distances depend on the pipe's design. Increasing these distances or installing a flow conditioner may be necessary to obtain the best accuracy. For more information, refer to EN ISO 5167-1.

EN ISO 5167-1 specifies the straight inlet and outlet distances that must be complied with when installing fittings in pipe lines in order to achieve calm flow conditions. The most commonly used elements that could lead to turbulence in the flow are shown below. The related minimum inlet and outlet distances that ensure a calm flow are also specified.

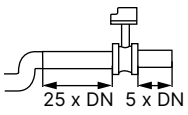
Make sure that the measuring conditions at the point of measurement are calm and problem-free.

DN = Orifice **Fluid direction ⇨**

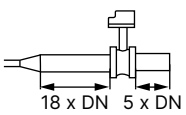
Regulating valve[1.)]



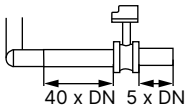
2 x 90° elbow joint



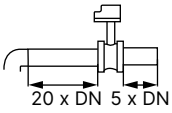
Expansion[2.)]



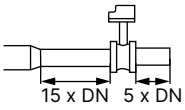
2 x 90° elbow joint
3 dimensional



90° elbow joint
or T-piece



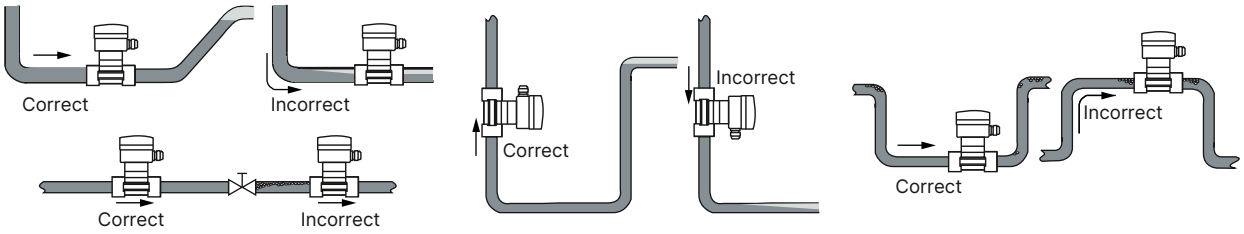
Reduction



1.) If the valve cannot be mounted after the measuring device, the minimal distances have to be respected.
2.) If an expansion cannot be avoided, the minimal distances have to be respected.
Please note minimum flow velocity

The device can be installed in either horizontal or vertical pipes, but following additional conditions should be respected:

- The pipe always has to be filled with fluid at all times near the device.
- The pipe design must be such that no air bubbles or cavitation can form within the medium near the device at any time.



Pressure and temperature ratings must be respected according to the selected fitting material. The suitable pipe size is selected using the diagram in the chapter "Nominal size selection" of the **data sheet Type S030** ▶.

DTS 1000010777 EN Version: - Status: RL (released | freigegeben | valide) printed: 28.10.2026

7. Product operation

7.1. Measuring principle

When liquid flows through the pipe, the paddle wheel with 4 inserted magnets is set in rotation, producing a measuring signal in the sensor (Hall sensor). The frequency modulated induced voltage is proportional to the flow velocity of the fluid.
A K factor, specific to each pipe, enables the conversion of this frequency into a flow rate.
This K factor is available in the Inline sensor-fittings' operating instructions, see **Type S030** ▶.

The electrical connection is provided via a cable plug according to DIN EN 175301-803 and/or a M12 multipin plug.

7.2. Functional overview

The display is used to:

- read the value of certain parameters such as the measured flow rate
- parameterize the device by means of 3 keys
- read the configuration of the device
- get notification of some events.

Display and operating keys	No.	Description
	**1**	Shows if the relay is open or closed
	2	Means that the access to the parameters and test menus is protected through a code
	3	Bar graph is running in each mode, except during a teach-in procedure
	4	"Confirm" key: • to confirm the function displayed • to confirm the parameters set
	5	Shows the status of the on/off output (red LED)
	6	"Next" key: • to select the digit at the left • to go to the next function
	7	"Back" key: • to change the value (0...9) of the selected digit • to go back to the previous function

The device can be calibrated by means of the K factor (proportionality factor) of the fitting, or via the teach-in function. User adjustments, such as engineering units, output, filter and bar graph are carried out on site.

Operating levels

The device has 2 operating levels:

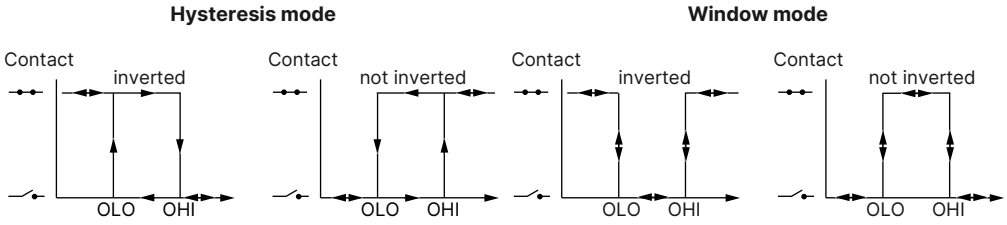
- the process level
- the configuration level, which comprises the parameters and the test menus

Operating level	Functions
Process	• Indication of – the value of the measured flow rate – switching thresholds (high and low value) – the value of the 4...20 mA output (flowmeter only) • Access to the parameters and test menus of the configuration level
Configuration - parameters menu	• To make the settings needed for operation: – engineering units (international measuring units) – K-factor/Teach-in function – 4...20-mA-current output (flowmeter only) – selection of switching mode: window, hysteresis (see chapter "7.3. Function modes" on page 12) – selection of threshold value (see chapter "7.3. Function modes" on page 12) – delay – filter – 10-segment bargraph (select min. and max. value) • Additional parameter definition – backlighting – password protects the access to the parameters and test menus
Configuration - test menu	• To test the configuration made in the parameters menu with entering of a theoretical value • To read the frequency of the measured signal • To adjust the 4...20 mA current output

7.3. Function modes

Flow threshold detector with standard On/Off output

- 2 switching modes for the output, either hysteresis or window, inverted or not



- Configurable delay before switching
- Possible outputs depending on the variant: relay, transistor NPN, transistor PNP

Flow transmitter with current output for the measurement value

- 4...20 mA output
- 4...20 mA output + relay output

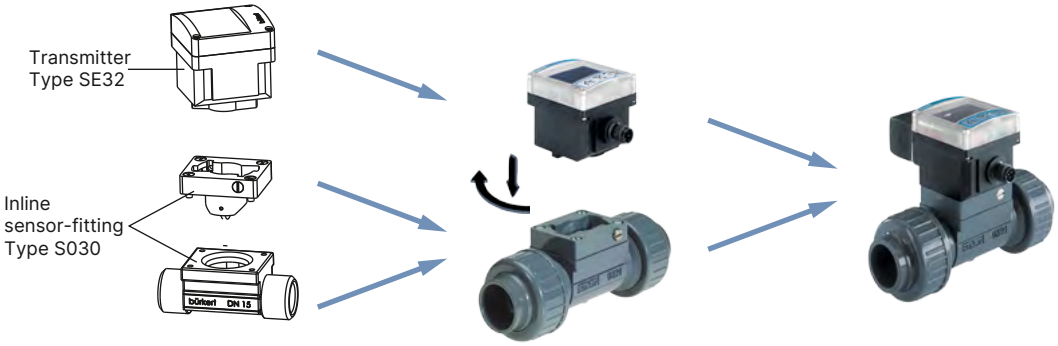
DTS 1000010777 EN Version: - Status: RL (released | freigegeben | valide) printed: 28.10.2026

8. Product design and assembly

8.1. Product assembly

Note:

- The device Type 8032 is made up of a Bürkert Inline sensor-fitting Type S030 equipped with a paddle wheel sensor and a transmitter Type SE32.
- The Inline sensor-fitting Type S030 ensures simple installation into pipes from DN 06...DN 65. The transmitter Type SE32 can be mounted on any Inline sensor-fitting Type S030 and fastened with a bayonet catch, see **data sheet Type S030** ▶ for more information.



9. Networking and combination with other Bürkert products

Example:

Type 8032

4...20 mA output	Transistor output	Relay output
Type 8802 ▶ **(2301 and 8693)** ELEMENT Continuous control valve systems	**Type 6212** ▶ Servo-assisted 2/2-way diaphragm valve	**Type 6281** ▶ Servo-assisted 2/2-way diaphragm valve

DTS 1000010777 EN Version: - Status: RL (released | freigegeben | valide) printed: 28.10.2026

Order online now

10.2. Recommendation regarding product selection

A complete flowmeter/threshold detector Type 8032 consists of a compact flow transmitter Type SE32 and a Bürkert Inline sensor-fitting Type S030.

See **data sheet Type S030** ▶ for more information.

Two different components must be ordered to obtain a complete device. The following information is required:

- **Article no.** of the desired compact Type SE32 flow transmitter (see chapter "10.4. Ordering chart" on page 14)
- **Article no.** of the selected Type S030 Inline sensor-fitting (see **data sheet Type S030** ▶)

10.3. Bürkert product filter

Bürkert product filter – Get quickly to the right product
