

Magnetic inductive sensor without flange (wafer connection)

- For connection to a transmitter Type SE58 (with or without display, in compact or remote variant) for flow measurement
- Design mainly for use in applications with water
- Flow measurement 25...approx. 75.000 l/min for DN 25...DN 400

Product variants described in the data sheet may differ from the product presentation and description.

Can be combined with

	Type SE58 ▶ L variant of the transmitter for electromagnetic-inductive flow sensors
	Type SE58 ▶ M variant of the transmitter for electromagnetic-inductive flow sensors
	Type SE58 ▶ S variant of the transmitter for electromagnetic-inductive flow sensors

Type description

The Type S054 magnetically inductive flow sensor (compact or remote version) is suitable for liquids with a minimum conductivity and for use in applications with requirements in areas of water measurements.

The combination with the dedicated Type SE58 S transmitter (minimum required conductivity: 20 µS/cm) or with the Type SE58 M or Type SE58 L transmitters (minimum conductivity required: 5 µS/cm) results in a flowmeter with different performance, functions, materials and approvals, with the corresponding suitability for the respective applications depending on the respective requirements.

With the Type SE58 S you get a compact device, with the Type SE58 M and Type SE58 L compact devices or remote versions are created for which the transmitter and sensor are connected by 2 cables up to a maximum length. Standard process connections available for the Type S054 are wafer connections.

1. General technical data

The electromagnetic flow sensor Type S054 in a compact or remote variant is intended for use with transmitter Type SE58, which is available in three variants L, M or S.

Further information can be found in the data sheet of the transmitter, see [data sheet Type SE58](#) ▶.

Product properties

Material	
Non wetted parts	
Sensor housing	Carbon steel painted (stainless steel 304 or 316 on request)
Junction box	Only for remote sensor: painted aluminium (on request: stainless steel 304 (1.4301) raw or polished)
Wetted parts	
Lining	PP or ebonite (hard rubber) (PTFE on request)
Electrode	Stainless steel 316L (Alloy C276, Titanium, Tantalum, Platinum-rhodium on request)
Seal	<ul style="list-style-type: none"> • FKM (EPDM on request) with PP lining • Without gasket with ebonite (hard rubber) lining (with PTFE lining on request)
Pipe diameter	DN 25...DN 200 (upper DN on request)
Dimensions	Further information can be found in chapter “4. Dimensions” on page 5.
Measuring principle	Electromagnetic induction Further information can be found in chapter “6.1. Measuring principle” on page 7.
Measuring range	0...0.72 m³/h to 0...1130 m³/h (upper on request) Further information can be found in chapter “7.4. Ordering chart” on page 8.

Performance data

At reference conditions and according to internal test procedures:	
<ul style="list-style-type: none"> • At room temperature • Constant flow rate during the test, liquid speed > 1 m/s • Pressure: >30 Kpa • Flow condition: observed inlet and outlet conditions • Zero point stability: ±0.005 % 	
Measurement deviation	If used with Type SE58 transmitter: <ul style="list-style-type: none"> • in compact or remote L variant: ≤ ±0.2 % of the measured value for flow velocity >0.5 m/s • in compact or remote M variant: ≤ ±0.8 % of the measured value for flow velocity >0.5 m/s • in compact S variant: ≤ ±0.5 % of the measured value for flow velocity >0.5 m/s See data sheet Type SE58 ▶
Repeatability	If used with Type SE58 transmitter: <ul style="list-style-type: none"> • in compact or remote L variant: ≤ ±0.1 % of the measured value for flow velocity >0.5 m/s • in compact or remote M variant: ≤ ±0.4 % of the measured value for flow velocity >0.5 m/s • in compact S variant: ≤ ±0.25 % of the measured value for flow velocity >0.5 m/s See data sheet Type SE58 ▶
Vacuum resistance	200 mbar (2.9 PSI) absolute at 100 °C (212 °F) for PTFE, at 60 °C (140 °F) for PP and at 80 °C (176 °F) for ebonite

DTS 1000471658 EN Version: C Status: RL (released | freigegeben | valide) printed: 16.07.2024

Medium data

Fluid temperature	<ul style="list-style-type: none"> • With PP lining, if used with Type SE58 transmitter: <ul style="list-style-type: none"> – in compact variant: -0...+60 °C (+32...+140 °F) – in remote variant: -0...+60 °C (+32...+140 °F) • With ebonite lining, if used with Type SE58 transmitter: <ul style="list-style-type: none"> – in compact variant: -5...+80 °C (+23...+176 °F) – in remote variant: -5...+80 °C (+23...+176 °F) • With PTFE lining (on request), if used with Type SE58 transmitter: <ul style="list-style-type: none"> – in compact variant: -20...+100 °C (-4...+212 °F) – in remote variant: -20...+110 °C (-4...+230 °F)
Fluid pressure	<ul style="list-style-type: none"> • PN 16 (232 PSI) with PP or ebonite lining • PN 40 on request, only with PTFE lining up to DN 150
Minimum conductivity	5 µS/cm (or 20 µS/cm with demineralised water)

Process/Pipe connection & communication

Pipe connection	Wafer
Electrical connection	2 cable glands PG9 (for remote variant of the sensor)

Approvals and conformities

Directives

CE directive	Further information on the CE directive can be found in chapter “2.2. Standards” on page 5.
Pressure equipment directive	<p>The device is subject to the requirements of the Pressure Equipment Directive 2014/68/EU. Category II device for group 1 and 2 fluids under the following conditions:</p> <ul style="list-style-type: none"> • maximum allowable pressure (PS) ≤ 40 bar • minimum/maximum temperature (TS): -10/+130 °C • within the following limits for liquids of group 2: <ul style="list-style-type: none"> – PN 10 for DN 400...DN 500 – PN 16 for DN 250...DN 300 – PN 25 for DN 200...DN 250 – PN 40 for DN 40...DN 250 • within the following limits for liquids of group 1 with a vapour pressure at the maximum allowable temperature not exceeding 0.5 bar (g): for diameters above DN 25 and PS x DN > 2000

Environment and installation

Ambient temperature	According to the used variant of Type SE58 transmitter and its material Further information can be found in the data sheet of the transmitter, see data sheet Type SE58 ▶.
Relative air humidity	≤ 90 %, without condensation
Height above sea level	Max. 2000 m
Operating condition	Continuous
Equipment mobility	Fixed
Application range	Indoor and outdoor Protect the device against electromagnetic interference, ultraviolet rays and against the effects of climatic conditions.
Degree of protection according to IEC/EN 60529	<p>If use with transmitter Type SE58:</p> <ul style="list-style-type: none"> • in compact L and M variant: IP67 (IP68 optional) • in compact S variant: IP67 (IP68 optional) • in remote L and M variant: IP68
Installation category	Category II according to UL/EN 61010-1
Pollution degree	Degree 2 according to UL/EN 61010-1

2. Approvals and conformities

2.1. Conformity

In accordance with the Declaration of Conformity, the product is compliant with the EU Directives.

2.2. Standards

The applied standards which are used to demonstrate compliance with the EU Directives are listed in the EU-Type Examination Certificate and/or the EU Declaration of Conformity.

3. Materials

3.1. Bürkert resistApp

Bürkert resistApp – Chemical resistance chart

You want to ensure the reliability and durability of the materials in your individual application case? Verify your combination of media and materials on our website or in our resistApp.

200	362	200	271

1.) Tolerance +0/-3 mm

5. Product installation

5.1. Installation notes

Flow measurement

Note:

The device is not suitable for use in gaseous media and steam.

Minimum straight distances upstream and downstream of the sensor must be observed.

The device can be installed in either horizontal or vertical pipes, but following additional conditions should be respected:

- The pipe always has to be filled with fluid at all times near the device, when it is in operation.
- Mount the sensor in the indicated positions shown below to obtain an accurate flow measurement.

The suitable pipe size is selected using the diagram in the chapter **“5.2. Selection of the nominal diameter”** on page 7.

5.2. Selection of the nominal diameter

The following graph is used to determine the appropriate DN of the pipe and fitting for the application, according to the fluid velocity and the flow rate. On the chart, the intersection of flow velocity and flow rate gives the appropriate diameter.

Example:

- Nominal flow: 100 l/min
 - Optimal flow rate: 2...3 m/s
- Result: Select a pipe size of DN 32

6. Product operation

6.1. Measuring principle

Faraday’s law serves as the physical basis for magnetic flow measurement.

Magnetic coils are arranged around the pipeline to generate a magnetic field. Conductive liquids flowing through the magnetic field induce a voltage at two opposite metallic electrodes in contact with the medium. These electrodes are used to measure the induced electrical alternating voltage.

The signal of sensor Type S054 must be amplified and processed by transmitter Type SE58.

Further information can be found in the data sheet of the transmitter, see [data sheet Type SE58](#) ▶.

7. Ordering information

7.1. Bürkert eShop

Bürkert eShop – Easy ordering and quick delivery

You want to find your desired Bürkert product or spare part quickly and order directly? Our online shop is available for you 24/7. Sign up and enjoy all the benefits.

7.2. Recommendation regarding product selection

A complete flowmeter consists of a Type S054 (compact or remote variant) and a Type SE58 transmitter (compact or remote variant).

See [data sheet Type SE58](#) ▶ for more information.

Two different components must be ordered in order to select a complete device. The following information is required:

- **Article no.** of the sensor **Type S054** (see [“7.4. Ordering chart” on page 8](#))
- **Article no.** of the transmitter **Type SE58** (see [data sheet Type SE58](#) ▶ for more information)

7.3. Bürkert product filter

Bürkert product filter – Get quickly to the right product

You want to select products comfortably based on your technical requirements? Use the Bürkert product filter and find suitable articles for your application quickly and easily.
