1. ABOUT THE OPERATING INSTRUCTIONS

The Operating Instructions describe the entire life cycle of the product. Please keep the Operating Instructions in a safe place, accessible to all users and any new owners.

The Operating Instructions contain important safety information.

Failure to comply with these instructions can lead to hazardous situations. Pay attention in particular to the chapters 3. Basic safety information and 2. Intended use.

- ▶ The Operating Instructions must be read and understood.

Symbols used

DANGER

Warns against an imminent danger.

- ▶ Failure to observe this warning can result in death or in serious injury.

WARNING

Warns against a potentially dangerous situation.

- ▶ Failure to observe this warning can result in serious injury or even death.

CAUTION

Warns against a possible risk.

- ▶ Failure to observe this warning can result in substantial or minor injuries.

NOTICE

Warns against material damage.

Indicates additional information, advice or important recommendations.

Refers to information contained in these Operating Instructions or in other documents.

- ▶ Indicates an instruction to be carried out to avoid a danger, a warning or a possible risk.
- Indicates a procedure to be carried out.

Definition of the term product

The term "product" used in these Operating Instructions always refers to the fitting type S030.

2. INTENDED USE

Use of the product that does not comply with the instructions could present risks to people, nearby installations and the environment.

The fitting type S030 is intended to measure the flow rate of clean fluids in pipes. The fitting type S030 can be combined with a flow transmitter or a flow indicator, fitted with a bajonett connection.

- ▶ Use the product in compliance with the characteristics and commissioning and use conditions specified in the contractual documents, in the Operating Instructions of the product and in the Operating Instructions of the combined instrument.
- ▶ Use the product only in combination foreign devices or foreign components recommended or approved by Bürkert.
- ▶ Store, transport, install and operate the product properly.
- ▶ Only operate a product in perfect working order.
- ▶ Only use the product as intended.

3. BASIC SAFETY INFORMATION

This safety information does not take into account any contingencies or occurrences that may arise during installation, use and maintenance of the product.

The local safety regulations for which the operating company is responsible including the staff in charge of installation and maintenance.

Risk of injury due to high pressure in the installation.

- ▶ Before any intervention on the installation, stop the circulation of fluid, cut off the pressure and drain the pipe.
- ▶ Observe the fluid temperature-pressure dependency depending of the product used.

Risk of burn injury due to high fluid temperatures.

- ▶ Do not touch with bare hands the parts of the product that are in contact with the fluid.
- ▶ Before opening the pipe, stop the circulation of fluid and drain the pipe.

Risk of injury due to the nature of the fluid.

- ▶ Respect the prevailing regulations on accident prevention and safety relating to the use of dangerous fluids.

Various dangerous situations

- ▶ Do not use the fittings in PVC or PP in explosive atmospheres.
- ▶ Do not use the product in an environment incompatible with the materials it is made of.
- ▶ Do not subject the product to mechanical loads.
- ▶ Do not make any modifications to the product.
- ▶ Prevent any unintentional power supply switch-on.
- ▶ Only qualified and skilled staff can carry out the installation and maintenance work.
- ▶ Guarantee a defined or controlled restarting of the process, after a power supply interruption.
- ▶ Observe the general technical rules.

NOTE

The product may be damaged by the fluid in contact with

- ▶ Systematically check the chemical compatibility of the component materials of the product and the fluids likely to come into contact with them (for example: alcohols, strong or concentrated acids, aldehydes, alkaline compounds, esters, aliphatic compounds, ketones, halogenated aromatics or hydrocarbons, oxidants and chlorinated agents).

MAN 1009305334 EN Version: F 3

4. GENERAL INFORMATION

To contact the manufacturer of the product use following address:

Bürkert SAS

Rue du Giessen

BP 2000

F-67220 TRIEMBACH-AU-VAL

The addresses of our international branches can be found on the Internet at: country.burkert.com

Warranty conditions

The condition governing the legal warranty is the conforming use of the product in observance of the operating conditions specified in the Operating Instructions.

Information on the Internet

You can find the Operating Instructions and technical data sheet regarding the type S030 at country.burkert.com

5. OPERATING PRINCIPLE

The fluid flowing in the piping makes the paddle-wheel turn. The paddle-wheel rotational frequency f is proportional to the flow rate.

6. TECHNICAL DATA

Conditions of use

The fluid temperature and the fluid pressure may be restricted by the associated transmitter or indicator: refer to the related Operating Instructions.

| | |
|---------------------------------|--|
| Ambient temperature (operating) | depends on the combined transmitter or indicator. Refer to the related Operating Instructions. |
| Pressure class | PN16 (or PN40 on request) for metal fittings. PN10 for plastic fittings, depends on fluid temperature, see Fig. 1 . |
| Fluid temperature | depends on the materials the fitting body and the paddle-wheel are made, see Table 1 . |

| Paddle-wheel material | Fitting body material | Fluid temperature |
|-----------------------|--|-------------------|
| PP | <ul style="list-style-type: none"> ▪ Stainless steel ▪ Brass ▪ PVDF ▪ PP | +0...+80 °C |
| | ▪ PVC | +0...+50 °C |

| Padlock wheel material | Fitting body material | Fluid temperature |
|------------------------|--|-------------------|
| PVDF | <ul style="list-style-type: none"> ▪ Stainless steel ▪ Brass ▪ PVDF | -15...+100 °C |
| | ▪ PP | +0...+80 °C |
| | ▪ PVC | +0...+50 °C |

Table 1: Fluid temperature depending on the product materials

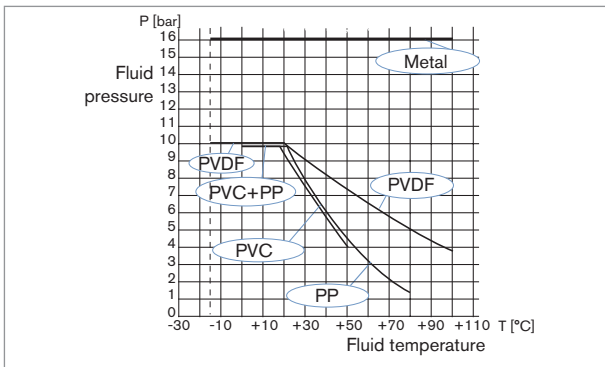

Fig. 1: Fluid pressure-temperature dependency curves for fittings used on their own

Standards and directives

The product complies with the relevant EU harmonisation legislation. In addition, the product also complies with the requirements of the laws of the United Kingdom.

The harmonised standards that have been applied for the conformity assessment procedure are listed in the current version of the EU Declaration of Conformity/UK Declaration of Conformity.

Conformity to the Pressure Equipment Directive

- Make sure the product materials are compatible with the fluid.
- Make sure that the pipe DN is adapted for the product.
- Observe the fluid nominal pressure (PN) for the product. The nominal pressure (PN) is given by the product manufacturer.

The product conforms to Article 4, Paragraph 1 of the Pressure Equipment Directive 2014/68/EU under the following conditions:

MAN 100030533

- Product used on a pipe (PS = maximum admissible pressure, in bar; DN = nominal dimension of the pipe)

| Type of fluid | Conditions |
|---|---|
| Fluid group 1, Article 4 Paragraph 1.c.i | DN ≤ 25 |
| Fluid group 2, Article 4 Paragraph 1.c.i | DN ≤ 32 or PSxDN ≤ 1000 |
| Fluid group 1, Article 4 Paragraph 1.c.ii | DN ≤ 25 or PSxDN ≤ 2000 |
| Fluid group 2, Article 4 Paragraph 1.c.ii | DN ≤ 200 or PS ≤ 10 or PSxDN ≤ 5000 |

Fluid data

| | |
|--------------------------------------|---|
| Maximum fluid viscosity | 300 cSt |
| Type of fluid | Clean, neutral or slightly aggressive liquids |
| Rate of solid particles in the fluid | max. 1 % |
| Maximum particle size | 0.5 mm |

General data

| | |
|--|---|
| Flow rate measurement | |
| ▪ Measurement range | ▪ 0.3...10 m/s |
| ▪ Measurement deviation | |
| - with standard K factor | - ± 2.5 % of the measured value* |
| - with K factor determined with a Teach-in procedure | - ± 1 % of the measured value* (at the flow rate value the Teach-in has been made) |
| ▪ Linearity | ▪ ± 0.5 % of the full scale* |
| ▪ Repeatability | ▪ ± 0.4 % of the measured value* |

* Determined in the following reference conditions:
medium = water, water and ambient temperatures 20 °C, minimum upstream and downstream distances respected, appropriate pipe dimensions.

Materials

Fig. 2: Sectional drawing of the S030 fitting

| Component | Material |
|--------------------|---|
| Seal | FKM EPDM with FDA agreement on request |
| Body | Stainless steel (316L - 1.4404) Brass (CuZn39Pb2) PVC, PP, PVDF |
| Screws | Stainless steel (316L - 1.4404) |
| Paddle-wheel | PVDF PP on request |
| Shaft and bearings | Ceramics (Al_2O_3) |

Dimensions

→ Please refer to the technical data sheets regarding the product type S030, available at: country.burkert.com

K factors (pulse/litre)

The K factors have all been determined under the following reference conditions: fluid = water, water and room temperatures of 20 °C, minimum upstream and downstream distances respected, appropriate pipe dimensions.

If the S030 fitting is combined with a flow transmitter or a flow indicator that does not automatically convert the K factors, make the conversion using one of the following formulae:

K factor in pulse/US gallon = K factor in pulse/litre
x 3.785 to obtain a flow rate value in US gallon/time unit

K factor in pulse/UK gallon = K factor in pulse/litre
x 4.546 to obtain a flow rate value in UK gallon/time unit

Some S030 fittings in DN15 and DN20 exist in 2 versions with different K factors.

If a version 2 exists, only version 2 is available from March 2012. The version-2 fitting have a "v2" marking that can be found:

- on the bottom of the DN15 or DN20 fitting in plastic:

- on the side of the DN15 or DN20 fitting in metal:

The names of the following norms have changed in the Operating Instructions:

- for the welding ends, norm BS 4825 is renamed BS 4825-1
- for the clamp connections, norm BS 4825 is renamed BS 4825-3
- for the flange connections, norm EN 1092-1 is renamed EN 1092-1 / B1 / PN16

- The norm ISO for clamp connections is replaced through the norm DIN 32676 series B.
- The norm DIN 32676 series A for clamp connections is added.

| Material | Type of connections and standard | K factors (pulse/litre) | | |

7. INSTALLATION

Safety instructions

DANGER

Risk of injury due to high pressure in the installation.

- ▶ Stop the circulation of fluid, cut-off the pressure and drain the pipe before loosening the process connections.

DANGER

Risk of burn injury due to high fluid temperatures.

- ▶ Do not touch with bare hands the parts of the product that are in contact with the fluid.
- ▶ Stop the circulation of fluid and drain the pipe before loosening the process connections.

Risk of injury due to the nature of the fluid.

- ▶ Respect the prevailing regulations on accident prevention and safety relating to the use of dangerous fluids.

WARNING

Risk of injury due to non-conforming installation.

- ▶ Fluidic installation can only be carried out by qualified and authorised personnel with the appropriate tools.
- ▶ Observe the installation instructions for the combined transmitter or indicator.

Risk of injury due to an uncontrolled restart.

- ▶ Ensure that the restart of the installation is controlled after any interventions on it.

WARNING

Risk of injury if the fluid pressure/ temperature dependency is not respected.

- ▶ Take into account the fluid pressure/ temperature dependency according to the materials from which the fitting is made and to the measuring device used (see the relevant user manual).
- ▶ Comply with the Pressure Directive 2014/68/EU.

→ Select an appropriate fitting regarding to the flow velocity and the flow rate of the fluid in the piping, see the following charts:

The graph is used to determine the DN of the pipe and the fitting appropriate to the application, according to the fluid velocity and the flow rate.

Selection example:

- Specification: if the nominal flow is 10 m³/h the dimensioning of the optimal flow rate must be contained in 2 to 3m/s
- Answer: on the chart, the intersection of flow rate and flow velocity gives the appropriate diameter, DN40 or DN50 for fittings with *.

* For fittings:

- with external threads according to SMS 1145,
- with welding ends according to SMS 3008, BS 4825-1 / ASME BPE / DIN 11866 series C, DIN 11850 series 2 / DIN 11866 series A / EN 10357 series A
- with clamp connections according to SMS 3017, BS 4825-3 / ASME BPE, DIN 32676 series A

→ Install the fitting on the pipe to comply with the upstream and downstream distances defined by standard EN ISO 5167-1 (see [Fig. 3](#)).

Fig. 3: Upstream and downstream distances depending on the design of the pipes.

- Use a flow conditioner, if necessary, to obtain the best accuracy.
- Prevent the formation of air bubbles in the pipe (see Fig. 4).
- Ensure the pipe is always filled with liquid (see Fig. 5).

Fig. 4: Additional recommendations on installation

Fig. 5: Additional recommendations on installation

Installing a fitting with welding ends

Follow the previously described general installation recommendations.

NOTICE

The seal on the fitting with welding ends may be damaged during welding.

- Before welding the weld-ends, unscrew the 4 tightening screws.
- Remove the sensor holder.
- Remove the seal.
- Weld the weld-ends.
- After welding, correctly replace the seal in the groove.
- Replace the sensor holder.
- Tighten the 4 screws in an alternating pattern, applying a nominal tightening torque of 1.5 N·m (1.11 lbf·ft).

Installing a Clamp fitting

- Make sure the seals are in good condition.
- Place seals adapted to the process (temperature, fluid type) in the grooves of the Clamp fitting.

→ Fix the Clamp fitting to the pipe by means of a clamp collar.

Installing a flange fitting

- Make sure the seals are in good condition.
- Place seals adapted to the process (temperature, fluid type) in the grooves of each connection.

Make sure the seal remains in the groove while tightening the flange.

→ Tighten the flange to fix the fitting to the pipe.

8. MAINTENANCE

Safety instructions

DANGER

Risk of injury due to high pressure in the installation.

- ▶ Stop the circulation of fluid, cut off the pressure and drain the pipe before loosening the process connections.
- ▶ Observe the fluid temperature/pressure dependency depending on the fitting used.

Risk of burn injury due to high fluid temperatures.

- ▶ Do not touch with bare hands the parts of the product that are in contact with the fluid.
- ▶ Stop the circulation of fluid and drain the pipe before loosening the process connections.

Risk of injury due to the nature of the fluid.

- ▶ Respect the prevailing regulations on accident prevention and safety relating to the use of dangerous fluids.

WARNING

Risk of injury due to non-conforming maintenance.

- ▶ Maintenance must only be carried out by qualified and skilled staff with the appropriate tools.
- ▶ Ensure that the restart of the installation is controlled after any interventions.

Cleaning

NOTICE

The product may be damaged by the cleaning solution.

- ▶ Clean the product with a cloth dampened with water or a detergent compatible with the materials the product is made of.

9. SPARE PARTS AND ACCESSORIES

CAUTION

Risk of injury and/or damage caused by the use of unsuitable parts.

Incorrect accessories and unsuitable spare parts may cause injuries and damage the product and the surrounding area.

- ▶ Use only original accessories and original spare parts from Bürkert.

| Certificate | Article number |
|---|----------------|
| Inspection certificate 3.1 acc. to EN 10204 | 803 723 |
| Test report 2.2 acc. to EN 10204 | 803 722 |
| Certificate with the surface finish value | 804 175 |
| 3-point calibration certificate (S030 combined with the instrument mounted) | 550 676 |
| FDA approval | 803 724 |

→ For any certificate, contact your Burkert sales subsidiary.

Some S030 fittings in DN15 and DN20 exist in 2 versions with different K factors.

If a version 2 exists, only version 2 is available from March 2012. The version-2 fitting have a "v2" marking that can be found:

- on the bottom of the DN15 or DN20 fitting in plastic:

- on the side of the DN15 or DN20 fitting in metal:

| Spare parts | Article number |

Fig. 6: Position of O-rings in an S030 fitting

10. PACKAGING, TRANSPORT

CAUTION

Damage due to transport

Transport may damage an insufficiently protected part.

- ▶ Transport the product in shock-resistant packaging and away from humidity and dirt.
- ▶ Do not expose the product to temperatures that may exceed the admissible storage temperature range.

11 STORAGE

CAUTION

Poor storage can damage the product.

- ▶ Store the product in a dry place away from dust.
- ▶ Storage temperature of the S030 fitting:

| Paddle-wheel material | Body fitting material | Storage temperature |
|-----------------------|--|---------------------|
| PP | <ul style="list-style-type: none"> ▪ Stainless steel ▪ Brass ▪ PVDF ▪ PP | -15...+80 °C |
| | <ul style="list-style-type: none"> ▪ PVC | -15...+60 °C |
| PVDF | <ul style="list-style-type: none"> ▪ Stainless steel ▪ Brass ▪ PVDF | -15...+100 °C |
| | <ul style="list-style-type: none"> ▪ PP | -15...+80 °C |
| | <ul style="list-style-type: none"> ▪ PVC | -15...+60 °C |

12. DISPOSAL

CAUTION

Damage to the environment caused by parts that are contaminated by fluids.

- ▶ Dispose of the product and its packaging in an environmentally-friendly way.
- ▶ Keep to the existing provisions on the subject of waste disposal and environmental protection.

Environmentally friendly disposal

- ▶ Follow national regulations regarding disposal and the environment.
- ▶ Collect electrical and electronic devices separately and dispose of them as special waste.
